OTHER (PLEASE PROVIDE DETAILS)

It is not a requirement to replace a removed shade tree. However, if a replacement is suggested, the Shade Tree Committee fully supports replacement of shade trees after completion of removal.

List proposed tree(s) from the Approved Street Tree Planting List for the Borough of Chambersburg:

- 1
- 2
- 3

Exceptions to this list may be granted by the Commission. If an exception to the list of replacement trees is desired, please indicate tree variety and reason for exception request.

Replacement Tree Procedures:

Existing tree stumps must be ground to at least 12" below surface level before planting in the same spot.

Where necessary, cuts will be made in the sidewalk to create tree pits of at least 3.5' x 3.5'. Contact the Borough Engineering Department (717-251-2415) to coordinate.

If a tree pit is recommended for this location, at the discretion of the Borough, a tree pit may be installed for a future tree installation.

Trees must be planted at least 10' from utility poles and at least 6' from water, sewer and gas services.

No tree can be planted closer than 25' to an intersection or alley, unless otherwise approved by the Borough Engineering Department.

Trees need to be adequately spaced when planting.

Call 8-1-1 Before You Dig Anywhere in the Borough of Chambersburg

Tree maintenance may be the responsibility of the property owner.

Refer to the Establish and Care for Your Tree section of the Approved Street Tree Planting List for the Borough of Chambersburg for more information.
