

1. What is the process and is there a charge to become a gas customer ?

First you should determine if gas is available in front of your house. If it is, there is no charge to install your gas service for a furnace or water heater and set the meter. A gas heat application must be obtained at the Service Center 80 S. Franklin Street and completely filled out by the plumber or heating contractor doing your installation. After the form is reviewed, proper permits have been received and PA OneCall has been notified, the installation will be scheduled.

If gas is not directly available the Gas Department installs 50 feet of gas main for no charge and the customer pays the balance of the main extension.

2. Is gas available in my neighborhood ?

Gas is available in most locations within the Borough. A call to our Utility Service Center at (717) 263-4111 would confirm if gas is available in your neighborhood.
